

Principal Toolbox®

- Would you like to standardise and support the use of PRINCE2™ in projects?
- Is reporting on portfolios and programmes taking too much time?
- Are you looking for a proven solution that is easy to use and quickly implemented?

The Principal toolbox is a proven software solution that takes away complexity in project, portfolio and programme management. It has specifically been developed to effectively support the world's leading methodologies PRINCE2 and Managing Successful Programmes (MSP™). The intuitive user interface and dashboards put you back in the driver seat and provide real-time status information. The automated reporting and communication features save time and money.

PRINCE2 project management

PRINCE2 is a proven and structured method for professional project management. With PRINCE2 the risk of project failure is reduced. To fully benefit from PRINCE2 it is necessary to have project managers use PRINCE2 in a disciplined and uniform way. This takes time and is not easy. With the Principal Toolbox managing a project according to PRINCE2 has become a lot easier

Programme and portfolio management

Programmes and portfolios are often business critical and characterised by multiple subprojects and stakeholders. For a successful realisation, it is essential that progress and risks are carefully managed. Also the project benefits and dependencies between projects must be monitored closely.

The Principal Ttoolbox software provides an intuitive set of dashboards and functionality to stay on top of the

programme / portfolio and make the right decisions about resources and capital investment. The programme features are based on the leading MSP methodology.

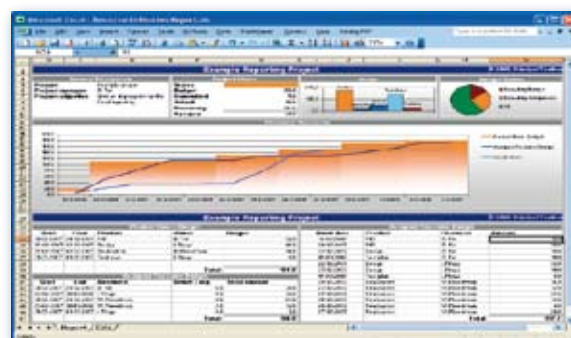

**You have invested in PRINCE2.
Why not consolidate PRINCE2 in
your organisation by using the
Principal Toolbox?**

Principal Toolbox offers many benefits

- Uniformity and professionalism in approach and methodology (PRINCE2, MSP).
- Fast and accurate communication and reporting.
- Real-time insight in programme and project progress and bottlenecks.
- Advanced dashboards with 'traffic lights' for time, costs and hours.
- Web-based issue and change management.
- Training-on-the-job with PRINCE2 explanation.
- And so on...

Save money!

Working together effectively and preventing project failure means saving on expensive hours of programme and project managers, team members and the project board.

Principal Toolbox®

Principal Toolbox® is a registered trademark of Fortes Solutions BV. PRINCE2™ and MSP™ are trademarks of the Office of Government Commerce.

Easy to implement

The Principal Toolbox is quickly implemented in your organisation. There is no software installation on the desktops. Users only require access to the company Intranet or Internet. The tool works excellently together with "best of breed" project planning and office software such as MS Project and MS Office. Standardised inter-facing allows low-cost integration with your existing enterprise systems like ERP, SAP and CRM.

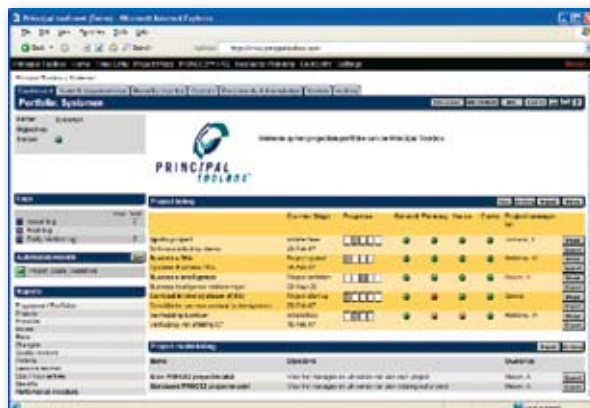

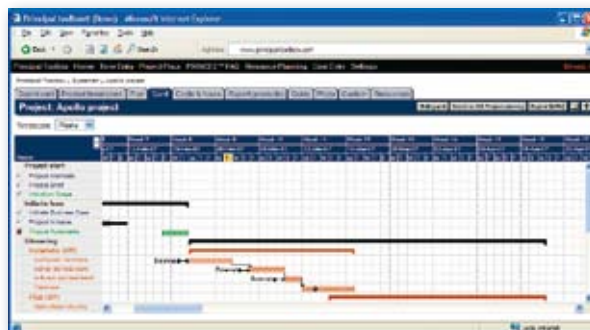

Principal Toolbox features

- Real-time project portfolio and programme dashboards with 'traffic lights'
- Monitoring of dependencies between projects and risks
- Benefits management support
- Quick and easy reporting at programme and project level
- Project plan with library of specialists & management products and work packages
- Graphical product breakdown with drag & drop functionality
- Workflow for realisation and approval of products, issues and changes
- Project models for systematic re-use of knowledge and best practices
- Logs on programme and project level: issue, risk, quality, change and lessons learned log
- Document manager with version control and history
- All activities (products, issues, actions etc) listed on a central 'Home' page
- Automatic monitoring of deadlines and new versions of documents
- Full support of the PRINCE2 roles: project board, project manager, team member

Principal Toolbox add-ons

Fortes Solutions has developed unique add-ons to expand the capabilities of the Principal Toolbox. These add-ons focus on specific areas of attention:

- Portfolio Management Server
- Resource Capacity Planning
- Benefits Management
- Timesheets
- Advanced Cost Registration
- MS Project Client Integration

SIMPLY FORTES.

Summary: The Principal Toolbox is user-friendly and will quickly deliver benefits.
